Meet The Hobbits

Get to know the characters that played major role in Tolkien's stories a success!

The protagonist of *The Hobbit*, he is one of a race of creatures about half the size of humans, fondness and with hairy feet. He lives in an unexpected place that is at once ancient and also very like the Victorian age, with its own domestic conveniences.

He is a good wizard who has powers beyond those of other characters. He sometimes uses a magic wand and he comes with an opponent and disappears with. He guides the travelers and saves them from evil, Goblins and Wargs.

He is the best dwarf, and he is very powerful. He is the guide of the quest. He is the leader of the Dwarves and the most powerful of his race.

He is a dragon whose evil, like Gollum's, is indicated by the isolation. He lives alone in the Lonely Mountain, the only person to guard the treasure he stole from the dwarves during the reign of Thorin's grandfather.

He served as a soldier in Lake-town, noted for his grace and speed. He was an able archer and inherited his Black Arrow from his ancestor. Considering it a family charm, he always used it.
